

## GUI Prog. For Add two no.

The screenshot shows a Windows application window titled 'Form1'. The window has a yellow background and a standard Windows title bar with minimize, maximize, and close buttons. Inside the window, there are three text boxes arranged vertically. The first is labeled 'Enter First No.', the second 'Enter Second No.', and the third 'Result Is'. Below these text boxes, there are five buttons arranged in two rows. The first row contains 'Add', 'Sub', 'Mul', and 'Div'. The second row contains 'Exit'.

```
Public Class Form1
```

```
    Dim a, b As Integer  
    Private Sub Button1_Click(ByVal sender As System.Object,  
ByVal e As System.EventArgs) Handles Button1.Click  
        a = TextBox1.Text  
        b = TextBox2.Text  
        TextBox3.Text = a + b
```

```
    End Sub
```

```
    Private Sub Button2_Click(ByVal sender As System.Object,  
ByVal e As System.EventArgs) Handles Button2.Click  
        a = TextBox1.Text  
        b = TextBox2.Text  
        TextBox3.Text = a - b  
    End Sub
```

```
    Private Sub Button3_Click(ByVal sender As System.Object,  
ByVal e As System.EventArgs) Handles Button3.Click  
        a = TextBox1.Text  
        b = TextBox2.Text  
        TextBox3.Text = a * b  
    End Sub
```

```
Private Sub Button4_Click(ByVal sender As System.Object,  
ByVal e As System.EventArgs) Handles Button4.Click  
    a = TextBox1.Text  
    b = TextBox2.Text  
    If b = 0 Then  
        TextBox3.Text = "Can not div by Zero"  
    Else  
        TextBox3.Text = a / b  
    End If  
  
End Sub  
  
Private Sub Button5_Click(ByVal sender As System.Object,  
ByVal e As System.EventArgs) Handles Button5.Click  
    End  
End Sub  
End Class
```
